SUBJECT NAME	TEAMWORK SKILLS	SUBJECT CODE	PEC 400
LECTURER	ROSIDAH BINTI ROSDI		
TOTAL MARKS	/100		

Portfolio Overview

This portfolio presents three collaborative activities related to teamwork, communication, leadership, community engagement, and practical problem-solving. Each activity shows how group members contributed different roles to complete a shared objective.

No.	Activity	Main Teamwork Attributes	Evidence
1	Creative Presenters: Designing with PowerPoint and Canva	Coordination, communication, facilitation, stakeholder management, adaptability	Program photos to be inserted
2	Cybershield Ramadan: FISE CSR Program at Kampung Olak Lempit	Community service, communication, social responsibility, cooperation	Program photos to be inserted
3	Hearts for Hope CSR Orphanage Fundraising Program	Leadership support, logistics coordination, planning, fundraising teamwork	Program photos to be inserted

Activity 1: Creative Presenters - Designing with PowerPoint and Canva

1. Title and Introduction

The first activity was the Creative Presenters: Designing with PowerPoint and Canva workshop, conducted on 20 November 2025 at HOME Shah Alam Seksyen 9 (Terapi Matematik). The project was carried out by Team Error 404 in collaboration with Management and Science University and HOME Shah Alam. The workshop trained school-aged participants in basic digital literacy, presentation design, and Canva poster creation using the theme Say NO to Cyberbully.

2. Objective

- To teach young participants basic PowerPoint skills, including slide layout, text formatting, visual balance, and presentation design.
- To introduce Canva as a beginner-friendly creative tool for posters, templates, icons, and digital design elements.
- To encourage participants to apply digital skills through the Say NO to Cyberbully mini project.
- To improve participants' confidence, communication, teamwork, and creativity through guided activities and final presentations.

3. Group Members and Roles

- Puarasan A/L Subramaniam: Project Manager, responsible for planning, task monitoring, timeline control, and problem-solving.
- Muhammad Zarul Aziri Bin Maamur: Coordinator, responsible for team communication, meeting follow-up, workflow support, and liaison with HOME Shah Alam.
- Kousalya A/P Kalayarasan: Secretary, responsible for meeting minutes, documentation, official communication, and report support.
- Prhadeepraj A/L Jayabalan: Treasurer, responsible for budgeting, expenses, receipts, and financial summaries.
- Aiman Yatimi Bin Yusrizat: Content Developer, responsible for workshop content, training materials, and learning module quality.
- Krishanth Kumaran: Logistic Support, responsible for equipment, materials, setup, troubleshooting, and event-day technical readiness.

4. Activity Description and Pictures

The workshop began with registration and an opening briefing. Participants were introduced to the purpose of the program and guided into a supportive learning environment. The first session focused on Microsoft PowerPoint, where facilitators demonstrated slide layout, font selection, color usage, and visual organization.

The second session introduced Canva. Participants explored templates, icons, images, and design elements before developing their own awareness posters. The mini project required them to connect technical design skills with the social message of preventing cyberbullying. The pictures below show the team explaining tasks, guiding students with their devices, supervising student work, and supporting the final presentation session.

Note: I am marked with a black circle in the photos to show my direct involvement during the activity.

Explaining the workshop task to students during the hands-on session.

Helping students use their devices during the digital activity.

Overseeing students as they completed their digital poster work.

Students presenting their Say NO to Cyberbully project to the group.

5. Skills, Challenges and Conclusion

This activity demonstrated teamwork through clear role division, constant communication, and shared responsibility. My coordinator role was important because I connected the university team with HOME Shah Alam, helped reduce communication delays, and supported smooth cooperation between the project team, students, and venue management.

The main challenges were different levels of digital literacy, limited hardware, internet dependency, and time management. The team solved these challenges by using the Bring Your Own Device approach, preparing backup devices, giving individual guidance, and adjusting the session pace. Overall, the workshop showed how strong coordination and flexible teamwork can turn a community learning activity into a successful digital literacy program.

Activity 2: Cybershield Ramadan - FISE CSR Program at Kampung Olak Lempit

1. Title and Introduction

The second activity was Cybershield Ramadan, a FISE CSR program at Kampung Olak Lempit held on 7 March 2026 in conjunction with Sinar Ramadan 9.0. The program combined Ramadan community service with digital safety awareness and economic empowerment. Contributions were distributed to asnaf families through the Barakah Pantry initiative, while participants also shared useful knowledge on online scams and digital income opportunities.

2. Objective

- To support asnaf families in Kampung Olak Lempit through Ramadan donation distribution.
- To raise awareness on common online scam methods and ways to avoid becoming a victim.
- To introduce TikTok and Shopee affiliate concepts as practical examples of digital income generation.
- To strengthen teamwork, empathy, communication, and social responsibility through direct community engagement.

3. Group Members and Roles

- FISE CSR organizing team: Planned and coordinated the Ramadan CSR program with the local community.
- Facilitators and speakers: Shared scam-awareness guidance and digital income information with the community.
- Donation and distribution team: Prepared and distributed Barakah Pantry contributions to selected asnaf families.
- My role: Participant, supporting the program flow, community engagement, knowledge sharing, and house-to-house donation distribution.
- Community representatives: Assisted with identifying families, coordinating local movement, and welcoming the program team.

4. Activity Description and Pictures

The program began with community engagement activities under the Cybershield Ramadan CSR theme. The team explained practical ways to recognize and avoid scams, such as being careful with suspicious links, fake investment offers, unknown callers, and online shopping fraud. The session helped community members connect digital awareness with daily online behavior.

The program also introduced TikTok and Shopee affiliate ideas as simple examples of how digital platforms can be used to generate side income. After the awareness session, the team carried out house-to-house Barakah Pantry distribution, delivering donated items directly to asnaf families. The pictures below show the awareness talk, engagement with local children, and donation handovers during the house visits.

Note: I am marked with a black circle in the photos to identify my participation in the CSR program.

Participating in the scam-awareness sharing session with the local community.

Group photo with local children during the Cybershield Ramadan program.

House-to-house Barakah Pantry distribution with an asnaf recipient.

Donation handover with a recipient family during the Barakah Pantry visit.

5. Skills, Challenges and Conclusion

This activity showed teamwork through communication, cooperation, and community sensitivity. As a participant, I contributed by supporting the team's activities, engaging with community members, and helping with donation distribution. The activity also strengthened interpersonal skills because the group had to explain digital topics in a simple and respectful way.

The challenges included communicating technical online-safety topics to a mixed community audience and managing donation distribution across multiple homes. These challenges were handled through teamwork, patient communication, and clear task sharing. The experience helped build empathy, confidence, and a stronger understanding of how digital knowledge can support community welfare.

Activity 3: Hearts for Hope CSR Orphanage Fundraising Program

1. Title and Introduction

The third activity was the Hearts for Hope CSR Orphanage Fundraising Program, organized for Rumah Amal Budi Bistari as part of the Community Service MPU1082U4 fundraising proposal. The fundraising period was from 22 July 2024 to 2 August 2024 at MSU Campus. The program involved Groups 3, 8, and 9 working together to raise funds and collect useful contributions to support orphanage children.

2. Objective

- To raise funds and collect essential items for Rumah Amal Budi Bistari.
- To promote compassion, collaboration, integrity, and responsibility among MSU students.
- To plan fundraising activities such as donation campaigns, food and drink sales, sponsorship efforts, and promotional work.
- To prepare activity, logistics, food, media, marketing, and sponsorship teams for a coordinated CSR program.

3. Group Members and Roles

- Alyssa Aina Haris Goh: Program Manager, responsible for overall project direction and coordination.
- My role: Assistant Program Manager, assigned to support and oversee the Head of Activity and Logistics teams.
- Saw Jun Yuan: Assistant Program Manager, assigned to support the Media and Food and Beverage teams.
- Nur Natasha Farzana Binti Badrol Hisam: Secretary, responsible for records, meeting notes, and communication.
- Kavines Arumugam: Treasurer, responsible for financial tracking and fundraising updates.
- Head of Activity, Logistics, Food and Beverage, Media, Marketing, and Sponsorship teams: Planned specific activities, items, transport, meals, documentation, posters, and donor engagement.

4. Activity Description and Pictures

The group prepared a fundraising proposal that included the vision, mission, values, administration plan, marketing strategy, operations, financial plan, and meeting records. Fundraising ideas included donation campaigns, ice cream sandwich sales, float refresh sales, cash donations, groceries, books, clothes, and school stationery.

Several meetings were held to update progress and divide responsibilities. My role as Assistant Program Manager was connected to the Head of Activity and Logistics teams. This meant supporting activity preparation, checking logistical needs, helping organize transportation and materials, and ensuring the team understood the tasks required before the event. The pictures below show the team before the program, fundraising work, interaction with children, and the final group outcome.

Note: I am marked with a black circle in the photos to show where I was involved in the activity.

Team photo before the Hearts for Hope CSR program.

Taking part in fundraising activity with group members on MSU campus.

Leading or supporting ice-breaking activities with the children.

Group photo with the children and committee after the program.

5. Skills, Challenges and Conclusion

This activity demonstrated leadership support, planning, coordination, and accountability. My Assistant Program Manager role required teamwork across departments because activity planning and logistics depended on clear communication between multiple committees.

The main challenges were coordinating many members, managing sponsorship progress, preparing activity materials, arranging transport, and ensuring all teams were ready before the program. The group managed these challenges through physical meetings, task delegation, progress updates, and follow-up discussions. Overall, the activity strengthened collaborative leadership, communication, planning, and problem-solving skills.

CLO2 – PORTFOLIO SUBMISSION

The student will be able to:

Construct a well-organised portfolio by effectively applying relevant practical skills and techniques, while demonstrating collaborative interpersonal competencies that enhance personal and professional development. (P4, PLO4)

PORTFOLIO ASSESSMENT RUBRIC -INTERPERSONAL SKILL

Criteria	Beyond Expectation 4	Meets Expectation 3	Below Expectation 2	Needs Improvement 1	Not Attempted 0	Weight
Alignment of Activities to Attributes (with three samples) 30%	- Provides three or more well-selected activities, each accurately aligned with specific, well-defined soft skill attributes. - Shows clear relevance and diversity of activities.	- Provides three activities, each aligned with appropriate soft skill attributes. - Some connections lack depth or diversity.	- Provides 2–3 activities with limited alignment to soft skill attributes. - Vague attribute descriptions.	- Provides fewer than two activities. - Misaligned/unclear attributes	No samples or evidence provided.	
Evidence Compiled 30%	- Evidence is comprehensive, authentic, and well-organised, including supporting materials. - Evidence strongly validates the activities and attributes.	- Evidence is sufficient and organised, - Lacks variety or strong validation of the claimed attributes.	- Evidence is minimal or partially relevant, - Weak validation of attributes.	- Evidence is absent, poorly organised, - Irrelevant to the listed attributes.	No evidence of adaptation or transfer.	
Explanation of Activities vs Attributes 40%	- Explains each activity clearly and links it directly to the attributes. - Uses precise and well-supported details to demonstrate how the activity is performed and how it builds the attributes.	- Explains each activity and links it to the attributes, though some explanations may lack depth. - Uses some relevant details to show how the activity was done and how it builds the attributes.	- Gives a basic explanation of each activity with limited or unclear links to the attributes. - Uses minimal or general details about how the activity was done or how it builds the attributes.	- Provides little to no explanation of each activity or fails to link it to the relevant attributes. - Provides no precise details of how the activity was done or how it builds the attributes.	No goals or connections shown.
